PROFESSIONAL SUMMARY

AI/ML engineer with 4+ years building and deploying deep-learning models in production with PyTorch and TensorFlow across the full lifecycle - dataset creation, training, evaluation, and optimization. Computer-vision and multimodal experience spanning real-time edge vision (YOLOv8, sub-50ms inference) and transformer-based video summarization (5,000+ sessions, 60-70% manual-review reduction). Pairs model development with production engineering - APIs, cloud deployment, and security/compliance rigor (HIPAA, GDPR/CCPA-aware) relevant to identity, OCR, and fraud-detection systems.
