PROFESSIONAL SUMMARY

Applied AI engineer and hands-on builder who ships production AI and data systems end-to-end — from Postgres-backed services and APIs to agentic LLM workflows. Comfortable leading technical discovery and proof-of-value with customers: 12 production APIs serving 100k+ requests/day across 20+ teams, agentic systems cutting token cost 42%, and distributed pipelines hardened for 99.9% uptime. Forward-deployed mindset: turn ambiguous customer requirements into working systems fast.

SKILLS

Forward Deployed • Client Delivery • PostgreSQL / SQL • APIs / Microservices • Distributed Systems • Agentic Workflows • Python / FastAPI • Docker / CI-CD • Proof-of-Value • RAG + Grounding

Languages: Python, TypeScript, JavaScript, SQL (T-SQL, PostgreSQL, SQLite), Java, C++

AI / ML: PyTorch, scikit-learn, XGBoost, LangChain, LlamaIndex, OpenAI, Anthropic, Hugging Face Transformers, Diffusers, YOLOv8

LLM / GenAI: RAG, agentic workflows, structured outputs, prompt engineering, evaluation pipelines, guardrails, grounding, embeddings, vector search

Backend: FastAPI, Flask, REST, WebSockets, Docker, Celery, Playwright

Frontend: React, Next.js, Vite, Tailwind, Chrome Extensions (Manifest V3)

Data: PostgreSQL + pgvector, MongoDB, Redis, Pandas, NumPy, Snowflake

DevOps: Docker, Jenkins, GitHub Actions, Grafana, Prometheus, AWS (EC2, S3, Lambda)

Domains: Healthcare AI (HIPAA-conscious), Applied AI, Enterprise AI, Workflow Automation, Computer Vision, Multimodal

PROFESSIONAL EXPERIENCE

Progress Solutions Inc.

Jul 2025 - Present

Jr. AI/ML Engineer Trainee - Agent Engineering, Production LLM

USA - Healthcare Technology, AI Consulting

- Built **Retrieval-Augmented Generation (RAG)** for clinical knowledge retrieval; recursive semantic chunking and transformer embeddings improved retrieval precision ~35%, reduced irrelevant retrieval >30%, response alignment >90%.
- Developed **agentic LLM workflows** for multi-step healthcare queries with tool discipline, structured reasoning, and grounding rules; response stability ~25%, hallucinations cut >30%.
- Shipped **predictive ML pipelines** (scikit-learn, XGBoost) for patient no-show and care engagement scoring; recall +15-20% on high-risk categories, precision held >90% via class weighting, stratified sampling, threshold calibration.
- Packaged ML/LLM inference as **FastAPI / Flask** services on **Docker** with structured logging and load simulation; post-deploy defects ~30%.
- EHR preprocessing (Pandas, NumPy); dataset reliability >98%, downstream instability -40%.
- HIPAA-conscious governance: de-identification, data lineage, evaluation audit trails, stakeholder-facing system-limitation docs.

Energy Solutions International (Emerson)

Jun 2022 - Apr 2023

Database & DevOps Performance Engineer (Intern)

Hyderabad, India - Oil & Gas ERP

- Optimized **T-SQL stored procedures** on a compliance-sensitive ERP (contracts, nominations, allocations, invoicing); query time -20%, retrieval latency -25%.
- Built **Jenkins CI/CD pipelines** for schema updates and stored-procedure deployments; deploy errors -30%, release cycle -35 to -40%.
- Designed performance dashboards with **SQL Server DMVs + Grafana**; incident recurrence -25%, root-cause resolution -30%.
- Tuned index maintenance and partition-aware queries; reconciliation runtime -15%, deadlocks -15%.
- Supported RBAC and audit logging for financial modules in a regulated environment.

- Built **transformer-based video summarization** over 5,000+ recorded sessions; hierarchical summarization and timestamp-aligned clip extraction cut manual review **60-70%**.
- AI-selected highlights aligned with human-curated moments **~85%**.
- Implemented **document Q&A with RAG**; hallucinations **~30%**, contextual accuracy **>85%**.
- Deployed as **Flask** API with a lightweight web interface for non-technical staff.

PROJECTS

Agentic Healthcare Claims Processing & Fraud Risk Intelligence System

5-stage multi-agent pipeline (Intake, Validation, Consistency, Duplicate, Risk Scoring) with schema-validated JSON contracts between agents to prevent cascading hallucinations. RAG-grounded CPT/ICD validation against vector-indexed policies. Audit-ready explainable risk scoring.

Python, LangChain, FastAPI, pgvector, GPT-4, schema contracts

E-Farming Digital Marketplace (Founder & Full-Stack)

Independently designed and shipped PHP/MySQL/Bootstrap AgriTech marketplace connecting small-scale farmers with buyers; 80-120 active users in phase 1; cart, reviews, community blogging features for repeat engagement.

PHP, MySQL, Bootstrap

Manga Lens - Multi-Provider AI Vision Chrome Extension

Real-time manga translation extension shipped to the Chrome Web Store. Multi-provider abstraction (4 AI vision providers: Claude Sonnet, GPT-4o mini, GPT-4.1 Nano, Ollama) with per-provider payload handling for worst-case failure isolation. 29 sites supported; 7-day cache; privacy policy and narrowed permissions.

TypeScript, Manifest V3, Service Workers, OpenAI / Anthropic / Ollama

Dream Decoder - Multimodal Creative Platform

End-to-end multimodal pipeline: text description, intermediate prompt-transformation layer, grounded image generation. ~30% contextual alignment gain, ~25-30% first-pass image success.

FastAPI, React + Vite, Tailwind, Perplexity Sonar, Replicate

EDUCATION

Master of Science, Computer Science - Kent State University	Aug 2023 - May 2025
Focus: Applied Machine Learning, NLP, Database Systems.	
Bachelor of Technology, Computer Science - KL University	Jun 2019 - May 2023
Founder / Lead of E-Farming platform (university project, pilot with 3 cooperatives).	

CERTIFICATIONS

Deep Learning Specialization - DeepLearning.AI (Coursera)	2024
